

The Client:

Department of Homeland Security - Transportation Security Administration (TSA) Headquarters

Unified Access Control and Intrusion Detection Platform

Solution Description:

Monitor Dynamics provides the software, hardware, training and systems that support TSA, which is a large and critical part of the US Department of Homeland Security (DHS).

MonDyn solutions deliver the essential expertise necessary to design and unify access control and alarm management operations for TSA. The result has been a cost-effective central command and control center located at TSA headquarters that has been operating efficiently for numerous years.

MonDyn products secure the top federal organization that secures our nation's air travel. Products used include the SAFEnet software platform, various SAFEnet custom integration modules and the SAFEnet Intelligent Digital Controller (IDC) Hardware. Top TSA security personnel have assisted MDI in making the SAFEnet software platform better through constant communication with the support and customer service team regarding new features and functions.
